EDUCATION

Georgia State University — Atlanta, GA
B.S. in Computer Science, Expected May 2027, GPA: 3.5

Relevant Coursework: Artificial Intelligence, Machine Learning, Database Systems, Software Development, Probability & Statistics in R, Computing in Python, Data Structures & Algorithms, Robotics, Linear Algebra, Calc I & II

EXPERIENCE

Apple — Austin, TX
Software Engineer Intern, IS&T – Apple Online Store (AOS) *Summer 2026*

- Developed AI-driven recommendation & warning feature for AOS using Apple Intelligence and user behavioral data.
- Cut average end-to-end response latency by over 50% by designing a fallback model pipeline to meet production target.
- Resolved 3 major AOS production bugs affecting millions of users, owning each fix from code review through merging.
- Quantified projected feature impact with data and product partners and pitched to leadership for an approved roadmap.

Broadwell Group Inc. (BGI) — Atlanta, GA
Frontend Engineer Intern, Remote *Summer 2025*

- Independently built & deployed company website replacing a 9-year-old legacy site (custom WordPress, HTML, CSS, JS)
- Shifted company from an outdated legacy hosting package to a modern service, reducing costs by 24% per year
- Created a new site with modern design, optimized assets/plugins, & mobile UI, reducing page load time 50%

PROGSU — Atlanta, GA
Director – Frontend UI/UX lead *Jan 2026*

- Developing full-stack club wiki (progsu.com/wiki) serving 1800+ members, featuring a GSU course explorer database & "gitpaid" career library with roadmaps covering DSA, system design, & ATL internship pipelines
- Write educational tech content & collaborate with design team on social media campaigns to improve outreach
- Mentored students through technical questions at events & co-led multiple workshops such as the GSU Anthropic Campus event delivering free API credits to 200+ students learning to build with Claude Code MCP servers & agents

PROJECTS

Global Fan Platform — TypeScript, SQL, HTML, CSS, Next.js, Supabase, NextAuth, OpenAI API *May 2026*

- Built full-stack platform for live events (World Cup, Olympics) using Next.js, TypeScript, & PostgreSQL featuring event feeds, communities, messaging, trip planning, AI-powered event finder, & real-time voice-to-voice translator.
- Engineered a speech-to-speech translation pipeline with 5 server-side API routes chaining OpenAI Whisper (STT), GPT translation, & TTS, including a streaming endpoint for low-latency cross-language conversation between fans at events.

Hybrid Fuzzy Logic Recommendation Engine Research Paper — Python, PyTorch, Pandas, scikit-fuzzy *April 2026*

- Product recommender that re-ranks Item-CF candidates with fuzzy logic steered by user preferences (price, trust, etc.)
- 10 input variables (price sensitivity, brand loyalty) & a 74-rule Mamdani inference engine to score recommendations
- Designed system to produce explainable recommendations where each output can be traced to readable if-then rules
- Processed features from Amazon review data like sentiment scoring, price normalization, & user interaction history

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, Java, SQL, HTML, CSS, SCSS, R
Frontend: React.js, Next.js, Vercel, Tailwind CSS, Figma, WordPress
Backend, Databases & APIs: Node.js, Express.js, MongoDB (Mongoose), REST APIs, JWT Authentication, Postman
Data, ML & DevTools: PyTorch, scikit-learn, NumPy, Pandas, Matplotlib, Git/GitHub
